Oryx

Submit to Oryx

> NOTE: Temporary pause on new submissions.
> We have received a large number of submissions in 2026, and *Oryx* is now closed for new submissions until 1 January 2027, to allow us to process the submissions so far received in a timely manner. Submission of Conservation News items, solicited content, revisions and resubmissions remains open, and the processing of manuscripts already received will continue.

Before you submit your manuscript to *Oryx*, please check the following:

- Your manuscript text is double spaced, with line and page numbers, in DOC or DOCX format
- All items in the References section are cited in the main text, and vice versa
- Any graphics have been prepared according to our Guidelines for preparation of figures and plates
- The text does not exceed the word limit for the item you are submitting: 7,000 words for Articles and Reviews (and 4,500 words for Articles on the status or conservation of threatened species, taxonomic groups or habitats), 4,000 words for Forum Articles, 2,000 words for Short Communications, 500 words for Conservation News and 700 words for Letters
- In the Methods section you have included the dates when the research was carried out
- The manuscript has not been published, or submitted for publication, elsewhere
- Your research and the manuscript follow the journal's Ethical standards and a statement to this effect is included in the manuscript
- All authors have read the submitted manuscript and agreed to its submission
- You have checked the existing evidence for any intervention (if applicable), at Conservation Evidence

When you submit your manuscript you will need to provide the following:

- Word count (all inclusive, except supplementary material)
- Your ORCID iD
- Names and contact details of all co-authors
- A covering note for the Editor
- Names and contact details of any people whom you would like to recommend or oppose as potential peer reviewers (optional)
- The dates when the research was carried out
- Confirmation that, if relevant, you have checked the existing evidence for any intervention
